

Another Contest 6 Problem 8 - #define int long long

Time limit: 0.25s **Memory limit:** 1G

You are given two 32-bit signed integers. Compute their product.

Input Specification

The input will consist of two lines.

The first line will contain a single 32-bit signed integer.

The second line will contain a single 32-bit signed integer.

Output Specification

Output the product of the two integers.
