April Fools' Day Contest 1 P4 - Choosing Choosily

Time limit: 1.0s   **Memory limit:** 1G

Scoring is difficult. You will have to grade your submission yourself to show you how difficult it is!

Output the score you should get for your submission (between 0 and 100). If 2 or more people output the same score or your score is not bounded between 0 and 100, you will receive 0 points out of 100. If no one else outputs your score, you receive the number of points you output out of 100.

Your submission will be rejudged at the end of the contest after everyone has submitted. Until then, any valid output will receive 100.

Output Specification

Output an integer between 0 and 100 (inclusive) for the score you should get.

Sample Output

```
83
```
