## Diagnostic Test 2016 Level 2

From 1939 to 1945, Polska did an involuntary stint as the General Government, territory of the Third Reich. During the experience, Polska learned many new things about occupying territories.

As any smart countryball knows, the first step of clay acquisition is convincing the international community that you have a legitimate claim to the clays in question. Polska can only claim to own clays that directly border it, which are the following:

- Germany
- Czech Republic
- Slovakia
- Ukraine
- Belarus
- Lithuania
- Kaliningrad Oblast

Help Polska achieve his irredentist dreams by replacing all instances of those country names in textbooks with `Polska`.

## Sample Input
