Please call the method `flag()` in the class `Secret`.

Download the Java agent [here](#).

Download the source code of the agent [here](#).

You can test locally using the command `java -javaagent:p1_agent.jar YourClass`.

Source Code

File: `Agent.java`

```
import java.lang.instrument.*;

class Secret {
    private void flag() {
        System.out.println("CTF-000000000000000000000000000000");
    }
};

public class Agent {
    public static void premain(final String agentArgs, final Instrumentation inst) {
        // thank goodness there's nothing here
    }
}
```
